RESTAURANT NORA'S HANDY GUIDE TO WHISKY TERMS

Whiskey: Fermented mash from cooked grains distilled into various spirits.

Straight Whiskey: Spirits from mash containing at least 51% of any grain, with a minimum of 4 years aging.

Pot-Stillled: A slower, more work-intensive (and expensive) method of distillation usually producing a superior whiskey with significant aging ability.

Unfiltered: An effort to preserve the original barrel flavor; often clarity is lost but with no adverse effects on the whiskey.

Single Barrel: Whiskey drawn from one select barrel and not mingled with any other whiskeys.

Small Batch: The mingling of select barrels to produce a specific style or taste.

Wheated Bourbon: Bourbon produced from a mash bill (recipe) that uses wheat in place of corn.

Straight Bourbon: Whiskey from a mash containing at least 51% corn.

Straight Rye: Whiskey from a mash containing at least 51% rye.
